Portland State University
Portland, Oregon 97207-0751

Dear Scott,

Attached is a draft of the scope of work for peer reviewing the models we are developing for the Columbia River Temperature Assessment. I've also enclosed the overheads used in two presentations we made in Portland. Although the work described in these two presentations was preliminary, the documents should give you an idea of the nature of the problem and how we are approaching it.

After you've reviewed this, please let me know if you're still interested in being a peer reviewer and if you would prefer to do it on contract .

Thanks for your help.

Sincerely,

John Yearsley
Environmental Scientist
